- Training Specialist
- Tech Support / Systems Specialist
- Project Management

## EDUCATION

**We Can Code IT** - *Full-Stack Java Boot Camp*
January 5, 2021 - April 23, 2021

## About Me

I am an Air Force Veteran, motocross enthusiast, and admirer of all things art and nature. I am a recent graduate from We Can Code IT's Full-Stack Java boot camp. In school I was able to build a core skill set developing back end Java, JavaScript, as well as extensive front end experience developing websites and web applications using HTML/CSS/SCSS etc. I also focused on gaining comprehensive skills in developing mobile versions of websites and web applications through the use of various back end code dependencies and dynamic media queries in the front end code.  I believe with my years in Systems Administration and Project Management, mixed with my Java Stack education would make me adaptable to a wide variety of Development opportunities.
